## InFocus at DVCC

1st June 2025

### The YPWhat! Awards.

Truth be know, whilst many of us submitted photographs for consideration in the YPU annual exhibition, many were left with a feeling of success and many were left feeling a little dejected.

Feeling dejected because of our photography is not the way of Dearne Valley Camera Club, so Nigel took to the stage to not only appraise us of how hard it is to be a judge (by rather helpfully pointing out things he saw in a award winning photograph that judges hadn't - creases in backdrops, lack of borders, distracting conservatories, ignoring concepts like rule of thirds for composition ...) but he also introduced the inaugural YPWhat! Awards that turned out to be a perfect antidote to any YPU blues.

The tone for the presentation was set on the opening slide as the hall was filled to the sounds of Jimmy James and the Vagabonds signing "Now is the time to set things right". What followed was some judging of the judges and more importantly a celebration of DVCC's photographers and their photographs.

## Finding Your Photographic Voice

Photography isn't just about taking a picture—it's about *saying something* with it. And that something? It's *you*. Your unique perspective, your favourite subjects, even how you see the light. That's what we call your **photographic voice**—and it's something every photographer, beginner or pro, can develop.

Now, if you're new to the club, don't worry—your voice doesn't have to be loud or perfectly formed. In fact, this part of your journey is the most exciting because you get to try everything! Landscapes, portraits, pets, puddles—explore it all. The more you shoot, the more you start to notice patterns in what you're drawn to.

Maybe it's the soft morning light on wet cobblestones that makes you pause. Or the way your daughter's laughter looks frozen in mid-air. Or the symmetry of buildings and doors. All of those little things? That's your voice, quietly speaking.

For more experienced photographers, finding your voice might mean refining it. Ask yourself: *Why do I shoot what I shoot? What story am I telling?* Sometimes we get so focused on technique that we forget to shoot from the heart. So this week, challenge yourself to revisit why you fell in love with photography in the first place.

At our club, we believe in **Learn, Develop, Share and Support**—and that starts by being curious. So this week, we invite you to take your camera (or even your phone!) and capture photos that really feel *you* - why not capture them in Barnsley or Wentworth in the next couple of weeks. Bring them to a show and tell meeting or share in our Facebook group. You might just inspire someone else—or discover something new about yourself.

And remember, no two voices are alike. That's the beauty of it.

### **Coming Sunday 8th June: "Smartphone to DSLR - Photography Is for Everyone"**

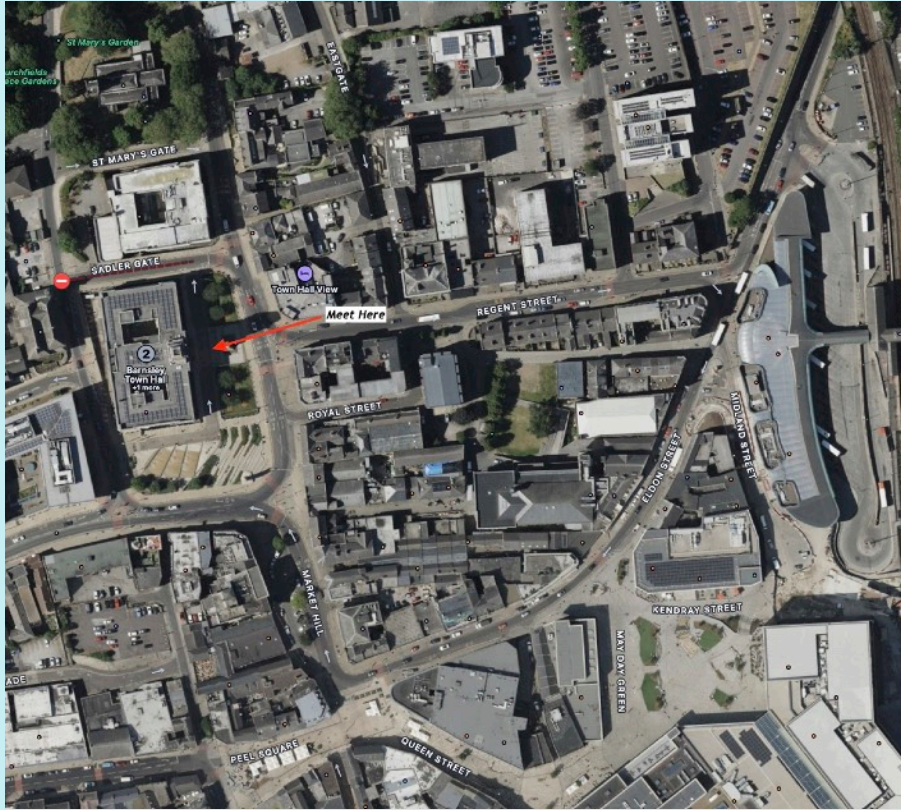

Whether you're just starting out with a phone camera or shooting full-frame, next week's article is all about making the most of whatever gear you have—and having *fun* doing it!
